PACKAGING TECHNOLOGIES FIRM INVESTS IN NEW VENTURE

HAYWARD, CA, SEPTEMBER 23, 2004: Delphon Industries announced its investment in Infixeon, LLC of Austin, TX today. The move was part of an ongoing strategy to merge innovative packaging technologies in order to provide unique materials and services for the shipping, processing, and packaging of high value technology components.

Infixeon was formed in January, 2005, with a vision of designing, manufacturing and selling superior solutions for protecting and transporting semiconductor wafers. Leveraging Delphon's position in the industry, the company plans to launch several products including horizontal wafer shippers, single wafer shippers, process carriers and automated material

handling systems. Additionally the company plans to use its relationship with Delphon to develop more innovative solutions for its customers.

About Delphon:

Delphon Industries, LLC was started in 2004 in order to provide a platform for future growth in merging innovative technologies. Under its corporate umbrella, the company operates Gel-Pak of Hayward, CA and Quik-Pak of San Diego, CA.

Gel-Pak products are used in a wide variety of industries that require the proprietary Gel solution for the safe shipping and handling of leading edge technologies. When companies around the world need to transport valuable devices without risk of damage, they rely on products made by Gel-Pak.

Quik-Pak uses its patented Open-Cavity Package technology and complementary assembly services to produce IC prototypes for semiconductor and MEMS manufacturers, and Fabless IC design firms. Quik-Pak can process any plastic package at any time.
