UltraTape Now Manufactures Customized Antimicrobial Labels, Graphic Overlays and Surface Protection Mats

Wilsonville, OR, May 23, 2016 - UltraTape Industries, a division of Delphon, announces its customized antimicrobial material and coating capabilities for labels, graphic overlays, and surface protection mats, designed to prevent the growth of bacteria, mold and mildew on frequently-handled surfaces.

Because microorganisms can cause product deterioration and pose significant health risks, antimicrobial surfaces are highly recommended for equipment used in hospitals, public kiosks, high traffic installations, and laboratories. UltraTape enables customers to effectively combat contamination on frequently touched surfaces, such as control panels, nameplates, keypads, and overlays with its customized antimicrobial coating processes and materials. The company works closely with customers to

create custom antimicrobial products that meet the needs of their specific application. "With growing concern over patient and workplace safety and the constant threat of disease transmitted by contact with contaminated surfaces, UltraTape has increased its efforts to find innovative ways to offer solutions to help protect people" said Jeanne Beacham, UltraTape CEO.

About UltraTape

Located in Wilsonville, Oregon, UltraTape Industries, a division of Delphon, manufactures high quality cleanroom tapes, labels and graphic overlays for critical environments. The ISO certified company maintains a cleanroom manufacturing facility to assure particle-free and residue-free products that meet even the most stringent standards. UltraTape specializes in material development in order to customize products to meet customer specifications.
