TOUCHMARK EXPANDS MEDICAL DEVICE PRINTING SERVICES

HAYWARD, CA AUGUST 16, 2012 - TouchMark, a division of Delphon and industry leader in Medical Device Pad Printing, announced today that it has expanded its service offerings to include Screen Printing for both medical and electronics parts.

TouchMark's Medical and Electronic Device Screen Printing Service offers an efficient, economical solution for larger format applications that do not require the tight tolerances and precision provided by pad printing. The company's Screen Printing Service is ideal for applications including medical and electronic instrument panels, large plastic films, medical fabrics and medical grade papers. TouchMark uses Medical Grade Inks and is able to work with virtually any substrate including polyurethane, polyethylene, PEBAX, PTFE, PVC, polypropylene, PEEK, and FEP. The company's combination of pad printing, screen printing, and surface treatment

options make TouchMark the industry leader in Medical Device Marking.

Background:

For more than 20 years the TouchMark has worked closely with leading Medical Device Manufacturers to provide solutions to their pad printing challenges. TouchMark has developed an expertise with difficult substrates, inks and unique shapes. In addition to pad printing, the company has expanded its offerings over the years to include material procurement and preparation, incoming inspection, cleanroom assembly, as well as post production services. The company is constantly growing its service menu to meet the changing needs of Medical Device Manufacturers.
