

DELPHON

CUSTOM POLYMER FILMS For Flexible Electronics

SPECIALIZED POLYMER FORMULATIONS: Delphon's in-house polymer scientists develop a wide range of high-performance polymer films and coatings for semiconductor, electronic, and medical applications.

- Polyurethane
- Fluorosilicone
- Silicone
- COPE
- TPE/TPU
- Urethane
- Ionomer
- TPV

CUSTOMIZED FILMS: We are fully equipped to extrude or coat customized polymer films to have a variety of unique properties required by today's flexible hybrid electronics.

- Stretchable
- Custom Tack levels
- Texturized Surface
- Printable
- Breathable

PROTOTYPE DEVELOPMENT: Our engineers work with the world's leading technology companies on next-generation film concepts.

- Facility ideal for prototyping and mid-volume production
- Film manufactured in a certified cleanroom environment

IN-HOUSE ANALYTICAL LAB: Delphon's analytical performs a variety of material characterization tests in order to ensure the highest quality standards.

- Elemental analysis
- Material composition
- Chemical composition
- Mechanical properties
- Adhesive tack
- Viscosity
- Surface energy
- Electrical conductivity

OTHER DELPHON CAPABILITIES...

Converting Services

In order to provide customized products for high-tech applications, Delphon offers a variety of converting services. Whether it's custom die cutting, laminating, or coating, our in-house capabilities make it possible to create products in small prototype batches or large production runs.

- Laminating
- Slitting
- Laser Cutting
- Die Cutting

Coating

Delphon has a wide range of coating processes for applications in the medical, semiconductor, aerospace and electronics industries.

- Protective
- UV
- Antimicrobial
- Antistatic
- Adhesive

Printing

Our variety of printing technologies and experience with specialty inks allow us to customize materials specifically for a customer's application.

- Screen printing
- Flexographic printing
- Pad printing
- Inkjet
- Hot-stamping

Brands **Gel-Pak**

Gel-Pak manufactures a family of innovative gel-coated boxes, trays, slides and films that protect devices during shipping, handling and processing.

www.gelpak.com

UltraTape

UltraTape manufactures cleanroom tape, custom labels and high-performance graphic overlays.

www.cleanroomtape.com

TOUCHMARK

TouchMark provides precision printing/marking and surface treatment surface for medical and electronic devices. www.padprint.com
